About Me

I'm a versatile full stack developer with a passion for optimization, organization, and modularization. I'm language agnostic; I believe concepts usually trump implementation details, so I am proficient in a handful of web development stacks and technologies.

Technical Toolbox

Languages:

Javascript, PHP, Java, Ruby

Client-side:

HTML5/XHTML, Bootstrap, Materialize, jQuery, Angular, React, Redux, HighCharts, RTML

Server-side:

MySQL, PostgreSQL, MongoDB, Node.js, Apache, Slim, Codelgniter, Rails, Express, Socket.IO

Workflow:

Git, Github, Grunt, Gulp, Bower, npm, Trello, TDD, Karma, Mocha, Chai

Other:

OOP, MVC, REST, HTTP, AJAX, AWS, Heroku, Wordpress

Web Developer Experience

Healthy Pets - Full Stack Developer

Feb 2016 - Present

- Developed websites that have a consistent feel and look throughout all viewports
- Implemented coding standards for the company to begin following
- Increased page load times by 15% by aggregating and condensing global scripts and stylesheets
- Enabled website pages to be loaded over secure connection
- Implemented dynamic sale pages to improve visibility of Healthy Pet's expiring and overstocked SKUs
- Created and managed external API for products and promotions
- Implemented site-wide discount campaign; created the front end and the back end (PHP) code

Coding Dojo - Student

Oct 2015 - Jan 2016

Completed an intensive web development program working 60-80 hours per week.

Projects:

- **DM Manager (*in progress*)** - Companion tool for popular tabletop RPG Dungeons and Dragons.
- **Wishlist** - E-commerce prototype where users add items to a wishlist that their friends can view.
- **Bucket Buddy** - Bucket list app that allows users to create and track the progress of a bucket list.
- **User Dashboard** - Social media platform prototype using LAMP.

Fortinet/Meru Networks - Service Ops Analyst

Aug 2013 - Oct 2015

- Developed a one-stop shop for all customer support related documentation and resources (Bootstrap, Angular)
- Designed, developed and deployed a web form for customers looking to upgrade their products. Generated a formatted email to be sent to the team with the required information (Bootstrap, jQuery)
- Maintained and developed the customer support portal (HTML, CSS, JS)

Freelance Developer

Jun 2013 - Present

- Designed, developed, and deployed manababyfood.com using Wordpress (HTML, CSS, JS)
- Created an internal tool for a client to help track the entire departments' (~40 people) travel information (MEAN)

Education

University of California, Davis

Coding Dojo

B.A. Psychology - June 2013

Completed - December 2015
