About Me

I'm a versatile web developer with the ability to build apps with my mind...and my fingers. I'm proficient in a handful of web development stacks and technologies, but I currently enjoy Javascript the most.

Technical Toolbox

Languages: Javascript, PHP, Java, Ruby
Client-side: HTML5/XHTML, Bootstrap, Materialize, jQuery, Angular, React, Redux, HighCharts
Server-side: MySQL, PostgreSQL, MongoDB, Node.js, Apache, CodeIgniter, Rails, Express, Socket.IO
Workflow: Git, Github, Grunt, Gulp, Bower, npm, Trello, TDD, Karma, Mocha, Chai
Other: OOP, MVC, REST, HTTP, AJAX, AWS, Heroku, Wordpress

Web Developer Experience

Coding Dojo   *Oct 2015 - Dec 2015*

Completed an intensive web development program working 60-80 hours per week. Passed qualifying exams for the LAMP and MEAN stack in the form of building a small application within 4 hours.

Projects:

- **DM Manager *(in progress)* -** Companion tool for popular tabletop RPG Dungeons and Dragons (DnD). Originally built in PHP, then refactored to use the MEAN stack.
- **Wishlist -** E-commerce site where users add products online to their wish list. Only allows users to buy gifts for others, not themselves.
- **Bucket List -** Bucket list app that allows users to create and track the progress of a bucket list. Built from scratch in 3 hours for the MEAN qualifying exam.
- **Mini Store -** Admin dashboard application that mimics a mini-store. Allows users(admins) to create customers, products, and orders.
- **Forum -** Discussion board built in MEAN that allows users to post topics/questions based on different categories.
- **User Dashboard** - Social media platform that allows users to create/edit profiles, and post comments to their wall. Also has admin capabilities to edit and add users.

Fortinet/Meru Networks   *Aug 2013 - Oct 2015*

- Conceptualized and started development on a one-stop shop for all customer support related documentation and resources (Bootstrap, Angular)
- Designed, developed and deployed a web form for customers looking to upgrade their products. Generated a formatted email to be sent to the team with the required information (Bootstrap, jQuery)
- Maintained and developed the customer support portal (HTML, CSS, JS)

Freelance Developer   *Jun 2013 - Jul 2013*

- Designed, developed, and deployed manababyfood.com using Wordpress (HTML, CSS, JS)

Education

University of California, Davis   B.A. Psychology - June 2013
Coding Dojo   Completed - December 2015
